

Support life-changing research for children around the world.

At Murdoch Children's Research Institute, we are committed to advancing medical research to improve the lives of children all over the world.

We invite like-minded, impact-driven organisations and philanthropists to join forces and co-invest in one of four funds that will help make an even greater difference to paediatric research, and the health of children both in Australia and around the world.

For a minimum donation of \$10,000, you can support one of four signature funds.

Brilliant Minds Fund

Support the career of a talented researcher and make one of the most valuable investments that can be made for the Institute, individual researchers, and the field of child health research.

Discovery Fund

Invest in promising projects and play a role in accelerating ground-breaking discoveries in medical research by providing seed funding for one-of-a-kind, proof-of-concept projects that show huge potential.

Innovation Fund

Fund projects with the greatest potential to deliver real world outcomes. Our innovative research can be converted into life-changing improvements in the communities in which children live, learn and grow.

Future fund

Support future generations of children by contributing to the long-term endowment of Murdoch Children's.

Corporate Benefits

- An Environmental, Social and Governance (ESG) partnership with one of the world's leading paediatric medical research institutes
- Stories and content for your website and social media
- Exclusive research tours and insights for your team and clients
- Annual Impact Report with stories of how your support is making a difference
- Community fundraising opportunities for your team and clients
- Opportunities to attend engagement and philanthropy events, as well as access to world-leading researchers

We would love to learn more about you and how we might work together to deliver ground-breaking research that has a long-lasting, positive impact on the world.
